**Baofeng 997-S GT Transceiver
65-108 / 136-174 / 400-520 MHz Dual-Band Ham Radio**

Building on the success of the UV-5R V2+, the 997-S is the latest radio from Baofeng featuring an enhanced high-performance microprocessor which amplifies radio transmission distance (TX/RX), receiving power as well as voice operated transmission (VOX) sensitivity. It truly blows the UV-5R out of the water in terms of performance and power.

This radio has upped the bar on ham radio technology! Compared to previous Baofeng products (UV-5R and the UV-B Series) this radio comes with a much more solid design with larger and tactile buttons, and a better antenna. This radio can be programmed with or without a PC to also work on private repeater systems. It is a compact, economical HT that includes a special FM receive band from 65 - 108 MHz which includes the regular FM broadcast band. Dual watch and dual reception is supported. You get up to 128 memories.
